3. When writing a text in the INFO window, you cannot leave it without a mouse. The END Button would be nice.

BESTEL

2. When in overzicht-mode, the home or end button don't really work.

Could the cursor go to the TOP with the HOME button and to the Bottom with the END Button?

There seem to be unformatted zero on the afrekeningsdocument

Bestel - if levering the save as standaard should be inactive allow erasing entry with space

BEstel Henry's problem with A and B in account

When there are Leveringen they should not be loaded when date and account are entereded, only the bestel should be loaded.

add view standaards

Klanten Makeover

Now that we are very active with input of Klanten (Particulier) it is maybe easier to start in the Search mode instead of inputting first a number, because never we will remember a klantnummer.

So I think that the F2 may not be the best solution. We should rethink this.

Also if you could see that the Cursor comes completely to the left in each field; that would be a great help.

Could you not create a new klantnummer as long as it is not Saved (bewaard)?
